ARAVINDAN Y

FULL STACK DEVELOPER | REACT.JS | JAVASCRIPT | PYTHON | FLASK | REST APIs

aravindan017@gmail.com · +91 79047 25729 · github.com/AravindanR-git · linkedin.com/in/aravindan-y-developer

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building practical web and mobile applications using React.js, JavaScript, Python, Flask, REST APIs and SQL. Skilled in responsive UI development, API integration, local-first data storage, debugging and deployment. Combines software development skills with business-focused problem solving to build tools for real users and operational workflows.

TECHNICAL SKILLS

Languages	JavaScript, Python, SQL, HTML5, CSS3
Frontend	React.js, Vite, TypeScript, Tailwind CSS, Bootstrap, Responsive Web Design, State Management
Backend & APIs	Flask, Node.js, Express.js, REST APIs, API Integration, Authentication, CRUD Operations
Data & Tools	SQLite, MongoDB, Supabase, Dexie, Local Storage, Git, GitHub, Capacitor, Android, POS/Thermal Printing

EXPERIENCE & PROJECTS

Independent Full Stack Developer | Client & Personal Product Development

2024 – Present

• Developed web and mobile applications from requirements gathering through implementation, testing, deployment and feedback-driven improvements.

• **Payanam — Offline-First Travel Expense Platform:** Built trip expense workflows used by 12 users across 20+ completed trips, covering participants, expenses, settlements, reusable vehicles and saved places. Used React and Dexie for local-first data storage, with Supabase integration planned into the sync architecture.

• **Tirumala Truck Billing:** Developed a truck/load billing application used by 60+ users, supporting load calculations, bill generation, DAC handling, reusable bill templates and POS/thermal receipt printing. Reported approximately 70% reduction in manual billing effort.

• **Inventory Management System:** Built product, stock, billing and delivery workflows with REST API and database integration, helping organize day-to-day inventory operations.

• **Other Projects:** Task Manager, Healthcare Appointment System, Product Display Page, URL Shortener API and User Management Dashboard.

EDUCATION

Full Stack Development with MERN NxtWave · Industry Ready Certificate of Specialization · 2024–2025	**100%**
MBA — Human Resource Management University of Madras, Chennai · 2022–2024 · Correspondence	**70%**
B.E. — Mechanical Engineering Panimalar Engineering College, Chennai · 2018–2022	**87%**
HSC — Class XII	**90%**
SSLC — Class X	**95%**

CERTIFICATIONS, PUBLICATIONS & AWARDS

NxtWave — Full Stack Development with MERN: Industry Ready Certificate of Specialization; 600+ hours of learning and 24+ projects/assignments. Official course achievement: 100%.

TCS NQT – IT (2026): 72%.

Research Paper Submission: PECTEAM2K20 — 3rd International Conference for Phoenixes on Emerging Current Trends in Engineering and Management.

Best Student Award: Received for 8 consecutive years during school.

First Prize — Final-Year Mechanical Engineering Project: Awarded for the final-year college project.
